Dear Parents,

This packet was created to help your child retain what they learned during kindergarten. The pages were set up where your child will do a language arts and math sheet three times a week. The packet will give students the opportunity to practice writing, reading comprehension, addition, subtraction, and many more skills that were covered in kindergarten. It should not take your child more than 20-30 minutes to complete one front and back sheet.

For this packet to work best, it is important to only do what is allotted for that week. Finishing the entire packet in one week will not help your child retain the information throughout the summer. It is also important to allow your child to work independently where they can, but to support them in areas such as reading directions and reading more difficult words.

There is also a reading log included in this packet. This way your child can record how much they read (or listen to a book read to them) each day. It is suggested that children read or are read to 20 minutes a day.

On Book Day, please have your child return the completed reading log <u>and</u> the packet to their 1st grade homeroom teacher.
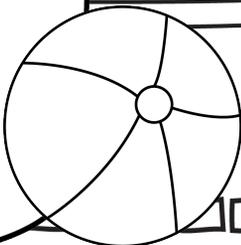

Thank you for taking an active role in your child's education.

Have a great summer!
